Interaction design programme at Saintgits Design School can be chosen after a one-year foundation programme which equips them with basic design skills and thought processes. The remaining three years are spent learning subjects like usability, user research, prototyping, interface design, icons and pictograms and more. They also learn animation, short film making, gaming design, 3D graphics, coding, internet of things and immersive media to expand their skillset.

Communication design students study the following courses* during their remaining semesters through assignments and projects, culminating in an internship and a research project in their penultimate semester and a capstone project in their final semester.

Semester 3
1. Communication Theory & Semiotics
2. Identity Design
3. Web Typography
4. Icons & Pictograms
5. Motion Graphics
6. Video Software
7. Usability Studies

Semester 4
1. HTML and CSS
2. Prototyping
3. Information Design
4. Animation Design
5. Interaction Design 1

6. 3D Graphics
7. Sound Design

Semester 5
1. Design for Accessibility
2. Creative Coding
3. Interaction Design 2
4. Visual Ergonomics
5. Data Visualisation
6. Advanced Prototyping

Semester 6
1. Game Design
2. Interactive Visualisation
3. Short Film Making
4. Immersive Media Design
5. Design for Learning
5. Internet of Things

Semester 7
1. Internship
2. Research Paper
3. Design Practice & Management
4. Systems Design
5. Sustainable Design

Semester 8
1. Capstone Project

Interaction design is for those who like to improve the usability of websites and apps and the make the user experience seamless. They would be doing some coding and user research to realise these goals.

*Course offerings may change as the syllabus get updated.

At the end of the programme, students have acquired the expertise to become successful interaction designers in IT and consulting firms. They would be designing interfaces and user experience backed by research and using their visual skills. They are ready to get employed in the industry or start their own design consultancies. Students wanting to specialise further can choose to do their Masters in Design as well.

Interaction Design

sds Saintgits Design School

Unique features

- No textbooks
- No written examinations
- Common foundation programme
- Multi-disciplinary learning
- A unique blend of Art, Design and Technology
- Block module course delivery
- Learning by doing
- Digital and non-digital methods
- Faculty drawn from premier design institutes in India and abroad
- Visiting faculty drawn from the industry
- Internships and placements
- Some courses common with Communication design discipline
